**\$299**

SKU: HKPACDC25A

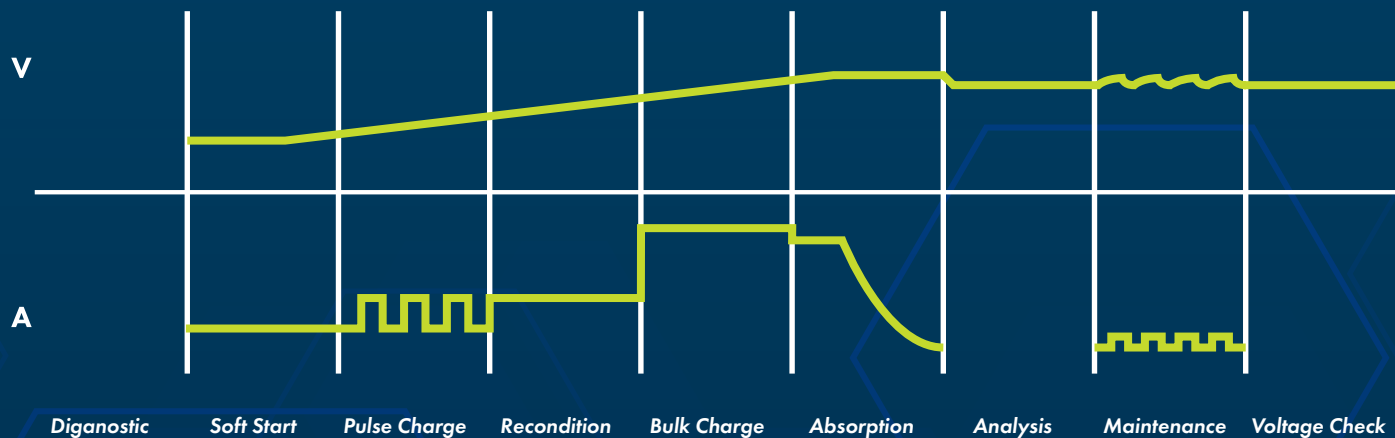

INCLUDES  
**EASY-CONNECT  
CABLES**

Charge your batteries from AC/mains power with our 240V Battery Chargers. Available in both 15A and 25A varieties, our chargers are equipped with an automatic 9-stage charging system designed to quickly and optimally charge a range of batteries.

Coming with a designated LiFePO4 charging system, the chargers have a BMS wake up mode which will help to pull your lithium batteries out of protection mode if they've been over-discharged.

Built with four pre-drilled mounting holes on each corner, the chargers can be mounted onto the wall of your garage or workshop with ease. The chargers have two cables coming from the bottom of the unit, which makes for a practical setup, no matter where it's positioned.

# KEEP YOUR BATTERY FIGHTING FIT

Our chargers come with an automatic 9-stage charging algorithm, designed to charge your batteries quickly and maximise their longevity.
