NOW TWICE AS BRIGHT

Our camp kits have been given a massive upgrade! Now using a brighter LED, you'll get a combined output of 2400 lumens with the 2-Bar Camp Kit, 4800 lumens with the 4-Bar Camp Kit, and a whopping 6000 lumen output with the 6-Bar Camp Kit. That's almost twice as bright as our previous kits without using any more power.

Ideal for canopy setups or for providing light around camp, these kits still come with everything you need including built-in magnets and pole-clips for mounting, as well as your dimmer, extension leads, 12V cigarette lead and more.

Includes
Tri-Colour
Dimmer

YOUR ULTIMATE CAMPING COMPANION
