All your 12V essentials in the one place. Made to give you quick and easy access to your power, our control hub is designed to be mounted into the back of your 4x4 canopy as your one-stop 12V station.

The panel has a range of USB, cigarette, and Anderson plugs, to make those quick portable connections simple, but also comes with six rocker switches, designed to be hooked up to those appliances that stay with you 24/7. Coming complete with a DC-DC Charger and a battery monitor, the box has all your power needs in the one convenient location.

# YOUR ALL IN ONE POWER SOLUTION

Charge your batteries while you drive or from the sun. The charger comes with an inbuilt 25A/40A MPPT solar regulator which has been pre-wired to a dedicated solar Anderson input on the side of the box. Compatible with LiFePO4, AGM, SLA, Gel, and Calcium batteries, it's the perfect addition to any 12V touring setup.
