

HARDKORR

DC CONTROL BOX

12V POWER DISTRIBUTION

NEW PRODUCT

SKU: HKPDCBOXLG (LARGE)

SKU: HKPDCBOXSM (MINI)

POWER + CHARGE YOUR DEVICES

This plug-and-play DC Control Box allows you to easily distribute 12V power from your auxiliary battery. Run or charge up to 13 appliances on our Large edition, or 10 on our Mini, simultaneously using its wide range of ports.

DC OUTLETS

HOW IT WORKS

Mounting the control box inside your 4x4 or camper trailer is easy thanks to the included slide-on mounting bracket.

Connect the control box to your auxiliary battery by running a cable from the battery terminals to one of the Anderson ports on the underside of the box.

If you want to remove the auxiliary battery from your vehicle (e.g. to use it at camp), you can easily slide the control box off the mounting bracket so you can take it with the battery.
