USER GUIDE

Introduction

Congratulations!

You have made an excellent decision with your purchase of this quality HARD KORR® product.

In doing so, you now have the assurance and peace of mind which comes from purchasing a product that has been manufactured to the high quality standards of HARD KORR® Lighting.

Our aim is for you to be completely satisfied with your purchase, and therefore, your new HARD KORR® product is backed by a comprehensive 5 Year Warranty and an outstanding after sales customer service team.

We hope you will enjoy using your purchase for many years to come.

If you require technical support or in the unlikely event that your purchase is faulty please contact our support team for immediate assistance. Faulty product claims made within the 5 year warranty period will be repaired or replaced free of charge.

However, be aware that the warranty will become null and void if the product is found to have been deliberately damaged, misused or disassembled.

General Information and Safety Instructions

This 3 colour camp lighting kit must be used only for the prescribed purpose. Any uses other than those mentioned in this manual will be considered a case of misuse.

The user and not the manufacturer shall be liable for any damage or injury resulting from such cases of misuse.

To use the camp kit properly you must observe the safety regulations, the assembly instructions and the operating instructions to be found in this manual.

Never allow children to play with electrical equipment

Children should be supervised at all times whilst operating the 3 colour camp lighting kit.

The manufacturer shall not be liable for any changes made to the camp kit nor for any damage resulting from such changes.

WARNING

Only use a HARD KORR® transformer (purchased separately) with the camp lighting kit to connect to 110V / 240V power outlets.

Do not connect to a power source greater than 12V, unless using a HARD KORR® 110V / 240V transformer.

WARNING: Do not abuse cords. Never pull on cords to remove lights from poles. This will result in cords being broken at light fitting and the manufacturer will consider this misuse of product. The user and not the manufacturer shall be liable for any damage or injury resulting from such cases of misuse.

NOTE: Your Controllers are not waterproof, so it is in your best interest to position them where they will not get wet or damp.

WARNING Do not look directly into the lights.

3 Colour Camp Lighting Kit

Warranty Details

The product is guaranteed to be free from defects in workmanship and parts for a period of 5 years from the date of purchase. Defects that occur within this warranty period, under normal use and care, will be repaired, replaced or refunded at our discretion.

You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Please contact your place of purchase for warranty information and replacements.

Frequently Asked Questions

Q. Will my Camp Lighting Kit run from 110V / 240V power outlet?

A. Yes, you must first purchase a HARD KORR® transformer if you wish to power your kit from 110V / 240V mains power.

Q. How does my Camp Lighting Kit go together?

A. For the first time installation we suggest you start from the cigarette lighter with the 3m cable. This way you will start with the right male connector, from there you can configure the lighting to suit the area you want to light up.

Q. Are my lights weatherproof?

A. Yes all lights and cables are weatherproof, however the supplied controllers are not.

Q. What do I do if my lights don't work?

A. First make sure you have a charged 12V battery to run from, or if coming from a 12v cigarette input inside your vehicle, please make sure ignition is switched on. If the kit is still not working, try directly from car battery. Next, please try connecting a transformer to mains power. If you are still experiencing difficulties after following these steps, please contact our customer service team.

Q. What do I do if my controllers are not working properly?

A. Firstly, please make sure you have not put 2 controllers on the same line of cable. To avoid this, please use the supplied splitter cables. If you are still experiencing difficulties after following these steps, please contact our customer service team.

Q. How many light bars can I run from each controller?

A. You can run up to 3 light bars from each controller.

Q. Why are magnets on back of light bars?

A. This is so you can fix light bars to poles in the tent or camper easily.

Q. Can I run these lights off a generator?

A. Yes, you can connect to a generator using a HARD KORR® transformer (purchased separately).

Q. What do I do if some lights work and some don't?

A. You may have a faulty lead. Please check the light directly from the cigarette or transformer lead. If all lights are working, please test each cord between the light and power until you find the faulty cord. If you are still experiencing difficulties after following these steps, please contact our customer service team.

Q. Where do I send back items that may need to be replaced under warranty.

A. For warranty information and replacements please contact your place of purchase.

Features

Rigid aluminium hard case to protect all your gear!

**NEW
3 colour
dimmer
switch**

**Pole Clips
included
with kit!**

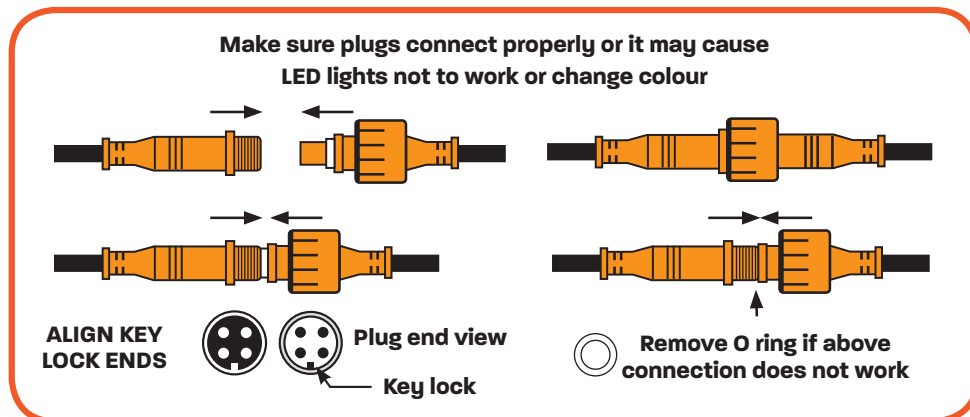

**Diffuser simply clips into the profile of your
Orange & White light bar**

Instructions

Assembly:

The below assembly is **only a guide**, as this kit is able to be arranged in multiple different setups to suit your needs.

- Step 1. Connect your 12v cigarette lead to an output. If you have a transformer, you may use this instead if needed.
- Step 2. Depending on your campsite, connect an extension cable if needed.
- Step 3. From the extension cable, you can either add more cables, or you can add a controller.
- Step 4. From the controller, you can add the splitter onto it to divert your lighting up to 3 different ways, unless you have a 2-way splitter.
- Step 5. And finally from here it's all up to you!
You can either extend the kit with extension cables, or finally your rigid bars.

Instructions

Typical Camper Install:

The diagram is to be taken as a reference only. Shown is 4 Orange & White bars with cables and accessories.

You do not have to follow this layout, you can place the bars and cables where ever you like to best suit your camp set up!
